 **Composite Prime**®
NATURAL EVOLUTION

Test	Test Method	Test Description	HD FENCE	Requirements
Wind Resistance Test	In House Method	The effective area is 3.09m ² (1.79m wide × 1.725m height)	Maximum Load: - 7120 N Linear Load - 2304 N/m ² Uniform Load - In excess of 120 mph wind force - Beaufort Scale 12	Load: - 1150 N Linear Load - 372.10 N/m ² Uniform Load - 55 mph wind force - Beaufort Scale 9
Acoustic Sound Reduction	ISO 10140-2:2021, EN 1793-2:2018 EN 1793-3:1997	Temperature: 18 °C Volume of the source room: 112m ³ Specimen area: 9.85 m ² Relative Humidity: 60% Volume of the receiving room: 137m ³	Single-number rating of airborne sound insulation DLR=27dB Max 30.9dB @ 5000 hz	
Deformation due to Thermal Radiation from the Sun	EN 15534-6:2015+A1:2017 Section 5 and Annex B	The height between two rails of the fence: 1725 mm The width (span) between two posts of the fence: 1790 mm Nominal width of the fencing element panel: 201.5 mm	Maximum bow: 0.00% (0.00 mm) Maximum cupping: 0.01% (0.02 mm)	Maximum bow: 17.9mm - 1% of the span (1790mm) Maximum cupping: 2.01mm - 1% of the width of the fencing element (2.01mm)

Beaufort Number	0	1	2	3	4	5	6	7	8	9	10	11	12
Description	Calm	Light Air	Light Breeze	Gentle Breeze	Moderate Breeze	Fresh Breeze	Strong Breeze	Near Gale	Gale	Severe Gale	Storm	Violent Storm	Hurricane Force
Wind Speed (mph)	< 1	1-3	4-7	8-12	13-18	19-24	25-31	32-38	39-46	47-54	55-63	64-72	≥ 73

These specifications represent the result of Intertek evaluation of HD Fence™ to the requirements of the standards listed above.

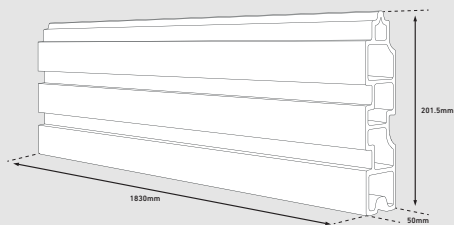

HD FENCE™

A Composite Prime Product

Board Dimensions:
50 x 201.5 x 1830mm
(50 x 192.5 x 1830mm when installed)

1800 x 1800mm panel consists of:
9 x HD Fence™ boards
1 x Aluminium bottom rail
1 x Aluminium finishing top rail
4 x Fixing brackets

COLOUR RANGE

HD Fence™ features a 2 in 1 shiplap & shadow gap design available in 3 colours: **silver, walnut & lava**
